

INCREASES **SOYBEAN**  
YIELD BY 6 BUSHELS  
PER ACRE

## AT AGRI-TECH CONSULTING IN WHITEWATER, WI

### Testing Summary

Ignyte increased soybean yield by 6.01 bushels when applied at V4 and 4.58 bushels when applied at R1.

- Ignyte increased the overall quality of the plant which increased yield.
- Both Ignyte trials bounced back 8 days faster after the Cobra application.

### Application

- Roundup applied to all trials at 26 oz/acre
- Select Max applied to all trials at 6 oz/acre
- Cobra applied to all plots
